For Immediate Release

NOTICE OF HYDRANT FLUSHING

The City of Champlin Utility Department will be flushing fire hydrants beginning Monday May 4^h through May 8th, 2009.

Please try to avoid doing laundry between 7:00 AM and 2:30 PM. During flushing rusty water could be drawn into your house and stain your clothes. If you experience problems with rusty water during flushing or any time throughout the year, turn off all water faucets for at least 20 minutes. After 20 minutes, go to the lowest level of your home and run the cold water full force for 3-5 minutes. When the water runs clear turn on other cold water faucets and run until water is clear. If the hot water is rusty, you may need to drain the water from your hot water tank, and then clear other hot water faucets. If the water is still rusty after trying these methods, contact the Utility Department at (763) 421-0154.

THIS NOTICE DOES NOT APPLY TO RESIDENTS OR BUSINESSES WITH PRIVATE WELLS.
