DISCOUNT  
NOW AVAILABLE!**

## Treatment

**LOW Cost  
BIG Gain!**

## vs. Removal

**HIGH Cost  
BIG Loss!**

**2 Year Protection**

Treated

Un-treated

Due to the discovery of emerald ash borer (EAB), the city of Champlin has chosen Rainbow Treecare as their contractor to treat public ash trees. This includes ash trees growing on public property and in parks.

A city-wide discount is being offered to Champlin homeowners through 2018 for trees on private property that are at least 10" in diameter and in good physical condition. **Rainbow Treecare** will inspect your tree(s) at no cost to you to determine if treatment is the best option.

**Rainbow Treecare** offers a money back guarantee for Champlin residents if your tree dies from EAB while under continuous protection.

damage on  
ash tree.

# EMERALD ASH BORER PREVENTION

## Injection Treatment Program

**Protecting** your ash tree for **20 YEARS** is **LESS** than the cost to remove it

### Benefits of the City of Champlin's Ash Injection Program:

In areas with high EAB populations, trunk injections have achieved a higher success rate, and protect the tree longer than soil-applied treatments. The city-wide bulk discount provides homeowners with an affordable option for managing their ash trees for long-term protection.

Contact **Rainbow Treecare** today  
for the city-wide discount.
